HISTORIC STRUCTURES JOB POSTING

Heritage Standing Inc. (HSI) is an engineering firm dedicated to old buildings. We are based in Fredericton, New Brunswick, Canada. As specialists in structural and conservation-based engineering, we solve complicated technical problems by using specialized knowledge, research level technologies, and international best practices.

The employees of Heritage Standing Inc. share a commitment to the values of integrity, quality of work, innovation, community, and long-term sustainability. Our clients experience these values when they receive unique and practical solutions, clarity about difficult problems, and honest communication.

Communities value their historic buildings for bringing people together and catalyzing a vibrant community identity. Old buildings are also key community assets that can help meet climate change and economic development goals.

Due to our continued growth we are currently seeking a structurally oriented candidate to join our small dynamic team. HSI works in the field of building conservation, and while we have identified a set of candidate requirements, we are open to exploring unique combinations of skills that complement our services in an unconventional way.

The successful candidate will:

- Provide structural evaluations and analysis
- Develop CAD drawings for existing conditions and new interventions
- Participate in site visits to collect and document building information and measurements
- Create detailed technical reports for assessments of existing structures and during construction reviews
- Provide construction administration when required
- Independently manage small projects
- Provide support for large project management and contract administration tasks
- Communicate and problem solve with clients

Applications must demonstrate attention to detail, strong writing skills, adaptability with new software, work efficiency, and analytical skills. Technical ability, curiosity, and commitment to community are the foundations of our work. Applications must state your willingness and ability to work in Canada.

ESSENTIAL SKILLS

<i>CAD experience (AutoCAD or Vectorworks preferred)</i>
<i>Technical writing experience</i>
<i>Problem solving skills</i>
<i>Attention to detail</i>
<i>An understanding of how buildings are designed and built</i>

ASSETS

<i>Registration, or the ability to become registered, as a Member in Training or Professional Engineer with the Association of Professional Engineers and Geoscientists of New Brunswick</i>
<i>Conservation education and experience</i>
<i>Bilingualism</i>
<i>Experience working with old buildings</i>

QUALIFICATIONS

<i>Degree in civil (structural) engineering OR another technical credential that would allow you to fulfill the described role</i>
<i>Valid driver's license</i>

Interested candidates please submit a cover letter, detailed CV, and a one page sample of your writing to hr@heritagestanding.ca. As cultural sensitivity is an important aspect of conservation work, please include the indigenous name of the river that flows through Fredericton, NB in your cover letter. Review of applications will begin May 12th, 2021 and continue until the position has been filled.

Thank you for your interest. Please contact us if you have any questions. Only those selected for an interview will be contacted.
